

Adarsha Shetty

Lead Software Development Engineer in Test (SDET) | Technical Leadership

+91 7259204173

adarsha.shetty.1989@gmail.com

Bengaluru, India

<https://www.linkedin.com/in/adarsha-shetty>

OBJECTIVE

Driving engineering excellence through **over 14 years** of Quality Engineering experience, targeting senior roles as Lead/Staff/Principal/Senior SDET to shape automation strategy, quality culture, and scalable software delivery.

CORE COMPETENCIES

- Test Strategy & Planning
- Automation Framework Design
- Quality Engineering Excellence
- Software Development Lifecycle (SDLC)
- Shift-Left Testing
- Test Data Management
- Risk-Based Testing
- Release Quality & Governance
- Continuous Testing
- Test Environment Management
- Defect Lifecycle Management
- Engineering Productivity
- Agile & Scrum Delivery
- Stakeholder Collaboration
- Technical Mentoring & Coaching

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, Python
- **Test Automation:** Selenium, Playwright, TestNG, pytest
- **API & UI Automation:** REST API Automation, API Testing, Web UI Automation, Performance Testing
- **CI/CD & DevOps:** CI/CD, Jenkins, Git, Docker, Kubernetes
- **Cloud & Infrastructure:** AWS, Terraform
- **Architecture:** Microservices
- **Performance Testing:** Jmeter, k6
- **AI-Assisted Engineering:** GitHub Copilot, Cursor, Claude Code, MCP,

EDUCATION

- **Bachelor of Engineering (B.E.)**
PES Institute of Technology
Bangalore, India | 2011

PROFILE SUMMARY

- **Solutions-focused professional with rich experience in Quality Engineering**, building scalable automation solutions for enterprise SaaS and FinTech platforms.
- **Specialized in automation architecture, API and UI automation**, microservices testing, and CI/CD integration, developing reliable, maintainable automation frameworks for rapid software delivery.
- **Proven engineering leader with experience defining test strategy, mentoring SDET teams**, establishing automation best practices, and collaborating with Product, Engineering, and DevOps teams.
- **Expertise in Java, Selenium, Playwright, REST Assured, TestNG, Jenkins, Docker, Kubernetes, AWS, Terraform, Git, and Agile methodologies**, with expertise in cloud-native test automation and continuous testing.
- **Forward-thinking quality engineer, leveraging GitHub Copilot, Cursor, Claude Code, MCP, AI Agents, and GenAI** to accelerate automation development, improve test reliability, and enhance engineering productivity.

WORK EXPERIENCE

May'25 – Present | Lead – Software Development Engineer in Test | Zeta, Bangalore, India

- Led a team of **7 SDETs** in delivering quality engineering initiatives for a large-scale banking platform, shaping test strategy across critical financial workflows.
- Transformed backlog API automation coverage from **0% to 100%**, driving an **80% reduction** in critical defects during release cycles.
- Accelerated end-to-end automation efficiency by **60%** through AI-driven engineering practices and integration of **MCP tools** for API and UI web automation.
- Established an AI-enhanced on-call and test failure analysis framework, reducing debug-to-fix cycles by **20%** while strengthening ownership, accountability, and operational coverage.
- Drove engineering initiatives to improve automation productivity, test reliability, and release readiness across quality engineering teams.
- Mentored SDETs on automation best practices, framework adoption, and effective problem-solving approaches.

Jun'15 – Apr'25 | HackerRank, Bangalore, India

Growth Path:

Jul'22 – Apr'25 | Staff Software Development Engineer in Test

- Strengthened product quality through scalable testing strategies, achieving a **65% reduction** in critical defects (**from 120 to 42 monthly**).
- Spearheaded automation transformation initiatives, delivering a **400% reduction** in testing time by optimizing execution from **8 hours to 2 hours** across **2,300+ test cases**.
- Designed scalable quality engineering approaches to support continuous product evolution and reliable software releases.
- Established automation best practices and guided engineering teams in improving test coverage and execution efficiency.

Jan'20 – Jul'22 | Senior Software Development Engineer in Test

- Engineered scalable execution solutions for **2,300+ UI scenarios** using cloud-based virtual displays, enabling **90% faster deployments** by reducing deployment time from **45 minutes to 4 minutes**.
- Optimized automation infrastructure, reducing costs by **45%** while maintaining **99.9% test environment reliability**.
- Improved test execution reliability by identifying infrastructure bottlenecks and implementing scalable solutions.

Jun'15 – Jan'20 | Software Development Engineer in Test

- Architected UI automation frameworks using TestNG and Selenium, reducing test execution time by **70%** from **5 hours to 1.5 hours**.
- Automated **150+ critical test cases** with **98% reliability**, improving regression coverage and release confidence.

LEADERSHIP DEVELOPMENT

- **Manager Capability Program**
Developed leadership capabilities in coaching, performance management, and team effectiveness.

INTERPERSONAL SKILLS

- Analytical Thinker
- Systematic Problem Solver
- Collaborative
- Detail-Oriented
- Adaptable & Agile
- Results-Oriented
- Resilient

Mar'12 – Jun'15 | QA Automation Engineer
| Sapient Global Markets, Bangalore, India

- Designed comprehensive test scenarios, test cases, and automation scripts to improve validation efficiency and proactively reduce quality risks.
- Developed automation frameworks that reduced manual testing effort by **60%**, improving testing productivity and execution efficiency.
- Supported implementation of quality practices to improve testing consistency and delivery outcomes.

NOTABLE ACCOMPLISHMENTS

- **Engineering Recognition:** *Awarded the **Spot Award (2024)** for delivering high-impact CI optimization initiatives that transformed automation efficiency and release velocity.*
- **Technical Leadership:** *Earned the trust to lead strategic quality initiatives while mentoring engineers and driving technical excellence across teams.*
- **Quality Advocacy:** *Promoted a quality-first culture through automation, shift-left testing, and continuous improvement practices.*
- **Innovation & Modernization:** *Accelerated quality engineering through the adoption of AI-assisted development and modern automation technologies.*
- **Business Value:** *Consistently translated quality engineering initiatives into improved delivery confidence, operational efficiency, and customer outcomes.*
